

## DATAMAN VERIFIERS

### ➤ Fully integrated designs

Lighting, camera, positioning and software all in one package.

### ➤ Compliant results

Meet industry 2-D code quality standards.

### ➤ Ease-of-use

Two model options—handheld or fixed-mount delivers maximum flexibility.

### Reliable, compliant results

Cognex® DataMan® 2-D (DataMatrix) code verifiers provide manufacturers with reliable results needed to comply with the latest 2-D code quality standards, mandated by most industries today.

DataMan verifiers include handheld and fixed-mount platforms for the ultimate in flexibility.

### Dataman handheld verifiers

As the only portable, compliant handheld verifier available on the market, the DataMan 8600V series verifiers offer superior ease-of-use and are highly cost effective. Using a handheld verifier, manufacturers can perform verification on the factory floor, rather than at a remote or fixed verification station.

- **Integrated lighting**  
Incorporates 30 degree dark field lighting ideal for verifying nameplates and other flat parts.
- **Mechanical standoff**  
Ensures uniform illumination and a fixed working distance.
- **Reliable**  
The only handheld verifier that conforms to AIM DPM standards and produces compliant results to the AIM DPM Quality Guideline 2006-1 with 30 degree angle lighting.

### Dataman fixed-mount verifiers

The DataMan 100 verification system provides manufacturers with a solution to verify the widest range of parts using a verifier that conforms to the ISO15426-2 verification system standards.

- **Flexible mounting**  
Can be mounted to a fixed location or used together with the optional 10 inch X-Z adjustable stand.
- **Flexible lighting**  
Includes adjustable 30/45 degree low angle lighting and 90 degree DOAL lighting for the widest range of parts and mark types.
- **Flexible optics**  
Adjustable optics enable the verification of codes with cell sizes as small as 7.5 mils to overall code sizes of 1 in. or 25 mm.
- **ISO15426-2 compliance**  
The DataMan 100 verification system has been tested to comply with the results of 'Judge' certified cards from GS1. Judge cards are tested on the 10x capable industry benchmark verifier.
- **Capable**  
Provides compliant results for the AIM DPM Quality Guideline 2006-1, ISO15415 and AS9132.
- **Easy set up**  
System includes a control box with integrated I/O, power and lighting quick connect cable.

## SPECIFICATIONS

	DataMan 8600V Series	DataMan 100 Series
Standards Compliance	AIM-DPM/ISO/IEC TR 29158:2011 Snap on Stand-Off accessory to ensure proper WD and 30 degree lighting angle relative to the code. Calibration card included.	AIM DPM 2006-1, ISO15415, ISO15426-2 and AS9132
Data Validation	US DoD UID Guidelines. GS1, ISO15434, ISO15418	US DoD UID Guidelines, GS1, ISO15434, ISO15418
Lighting	30 degree and Ultralight™ technology	30, 45 and 90 degree
Code Size — Maximum	0.5 in. (12.5 mm)	1 in. (25.4 mm)
Code Cell Size — Minimum	7.5 mils	7.5 mils
Electrical	DataMan 8600V with Serial USB: 5V – 6V DC, 5.0 W maximum LPS or NEC Class 2 power supply	Power supply included with DMR-100V-02
Code Verified	2-D DataMatrix	2-D DataMatrix
Report Generation Capability	PDF	PDF
Imager	1280 x 1024	752 x 480
Communications	USB, RS-232, Ethernet, Bluetooth with intelligent Bluetooth base station, and Wi-Fi with intelligent Wi-Fi base station	USB
Software Interface	DataMan setup tool	DataMan setup tool

The DataMan 100 Verifier supports 30° and 45° (shown) and 90° (not shown) lighting angles

The DataMan 100 Series, shown without optional stand.
